

## Handbook of Enterprise Systems Architecture in Practice

**Pallab Saha**, National University of Singapore, Singapore

Enterprise architecture (EA) is the organizing logic for a firm's core business processes and IT capabilities captured in a set of policies and technical choices.

### Handbook of Enterprise Systems Architecture in Practice

provides a comprehensive and unified overview of practical aspects of enterprise architecture. This Premier Reference Source includes a complete analysis of EA theory, concepts, strategies, implementation challenges, and case studies. The impact of effective enterprise architecture on IT governance, IT portfolio management, IT risks, and IT outsourcing are described in this authoritative reference tool. Researchers and IT professionals will gain insights into how firms can maximize the business value of IT and increase competitiveness.

#### Topics Covered:

Agile and interoperable virtual enterprises  
Business process modeling  
Case studies  
E-governance  
ERP systems

Integrated enterprise lifecycle  
Investment management  
IT systems implementation  
Virtual enterprises  
Web services

### PREMIER REFERENCE SOURCE

## HANDBOOK OF ENTERPRISE SYSTEMS ARCHITECTURE IN PRACTICE

**PALLAB SAHA**

"This book covers a wide range of Enterprise Architecture (EA) issues in a way that reflects many aspects of a global EA discussion that has been going on for nearly twenty years. You will find some variance in the approach and lexicon that contributing authors use in many of the chapters, but you will also find a number of common threads that are an indication of both the richness and diversity of thought in the EA community and of the continuing maturity of EA as a management best practice and a career field for business and technology professionals."

—Dr. Scott Bernard,  
Carnegie Mellon University

## About the Editor

**Pallab Saha** (pallab@iss.nus.edu.sg) is currently a member of the faculty at the National University of Singapore (NUS). His current research and consulting interests include IT governance, enterprise architecture, and business process management and he has published several research papers in these areas. Dr. Saha teaches courses in enterprise architecture, IT governance, and business process management at the post-graduate and senior executive levels (including CIOs). His current consulting engagements are in enterprise architecture for Singapore Government agencies. Dr. Saha is also a faculty member of the newly formed Center for E-Government Leadership (CeGL) in NUS and delivers executive programs to senior government officials from several countries. Dr. Saha is frequently invited to speak at international and local conferences on enterprise architecture and IT governance and is the primary author of the enterprise architecture methodology and toolkit for the Government of Singapore. He is also a contributing author of the enterprise architecture management guide being developed by the International Association of Enterprise Architects (a|EA).

Prior to academics, he was instrumental in managing Baxter's environmental health and safety off-shore development center (Bangalore) as head of projects and development. He has worked on engagements in several Fortune 100 organizations in various capacities. Dr. Saha received his PhD in information systems management from the Indian Institute of Science (Bangalore, 1999). His PhD dissertation was awarded the best thesis in the department and also received a special research grant for the same. Earlier he completed an MBA in information systems and prior to that gained a BSc in electronic sciences from Bangalore University.
